## **PROCHEM EUROPE LTD.** **PLASTICS STATEMENT**

At Prochem Europe Ltd we are aware of the growing concerns regarding the use of plastic, in particular its sustainability and environmental fate.

As manufacturers, users and consumers, we all have a responsibility to prevent and recycle waste in a responsible manner.

We encourage responsible re-use, recycling or disposal of our packaging. In many instances our plastic containers can be re-used, recycled, reprocessed, or sent to energy-from-waste facilities to produce heat and fuel, rather than sent to landfill.

We are working closely with our packaging suppliers to explore what alternatives there are to the use of conventional plastics and what innovative solutions exist to encourage re-use and / or recycling of our packaging.

Our bottle suppliers have confirmed that they are developing plastic solutions that incorporate both post-consumer and post-industrial recycled plastics to reduce the need for virgin materials from fossil fuel and to divert plastic from landfill or incineration.

We are committed to working with our suppliers and customers, towards reducing the generation of waste, and sustainable packing solutions which perform well, whilst not at the expense of the environment.
