

A257 STONECLEAN

LABEL INSTRUCTIONS

Product Description & Directions for Use:

A special blend of phosphoric acid, detergents and solvent designed for cleaning and restoring stone floor surfaces. Stoneclean is suitable for use on quarry tiles, ceramic tiles and other acid resistant stone and tile interior flooring, subject to pre-testing. Stoneclean will effectively remove limescale, grout stains, general soil and grease.

For professional and industrial use only.

Light duty cleaning: Mix 20ml Stoneclean per litre of water (1 to 50).

General cleaning: Mix 100ml Stoneclean per litre of water (1 to 10).

Restoration and limescale removal: Mix 250ml Stoneclean per litre of water (1 to 4).

Always pretest surface in an inconspicuous area with diluted Stoneclean solution before proceeding. Do not use Stoneclean on polished marble, terrazzo, granite, travertine, limestone or other acid sensitive natural stone composites, unless pre-testing indicates that the surface can be cleaned without damage or discoloration. Avoid contact with aluminium, stainless steel and other metals which may be affected by contact with acids.

Apply diluted solution by mop, soft brush or scrubbing machine. DO NOT SPRAY.

Scrub surface if required, then allow short dwell period for cleaning action.

Rinse well with plenty of clean water, then dry thoroughly with wet pick-up vacuum.

Floors can be buffed with a bonnet pad or polishing pad when dry.

- Stone tile & grout floor cleaner for quarry tiles, ceramic tiles, grout & limescale
